

## RCRA Inspection Summary

EPA Region 5 Records Ctr.

393607

REMARKS

11/21/83

Use this section to briefly describe site activities observed at the time of the inspection. Note any possible violations of Interim Status Standards.

This inspection was done mainly to:

1. Discuss contents of on-site landfill (closed).
2. Resolve questions concerning disposal of wastewater treatment sludge (FOO6).

According to Mr. Hammond No hazardous waste has ever been disposed of in the on-site landfill. It was used for Non-hazardous baghouse dust, incinerator ash, and soluble oil. In spite of the above statement Mr. Hammond acknowledges that a small amount of hazardous waste may have been disposed of in error at this location before RCRA rules became effective. Plant #2 has a methylene chloride degreaser and plant #3 had a trichloroethylene degreaser until about 5 years ago. This site may be a candidate for a 302 Preliminary Assessment and inspection.

Brown-Ferris Industries has a current permit to dispose of their wastewater treatment sludge (830138 expires 2-17-86) at the hazardous waste landfill in Winthrop Harbor.

While at the plant some ISS violations were observed:

1. Open drums & roll off box
2. Drums in poor condition
3. Leaking drum

4. Hazardous waste spilled on ground by roll off b
